

PARTICIPATING ORGANIZATION ENGAGEMENT STRATEGY
2024 CALL FOR PROJECT CONCEPT NOTES
INTERNATIONAL ROAD ASSESSMENT PROGRAM (iRAP)

I. Overall approach to UNRSF 2024 Call for Concept Notes

The International Road Assessment Program (iRAP) is a charity with a vision for a world free of high-risk roads. With the support of partners around the world, the iRAP methodology and tools have been used in more than 110 countries to assess more than 3 million km of roads and designs for safety. The methodology and tools have been created by iRAP with donations from charitable foundations (particularly the FIA Foundation), governments, development institutions, companies, research centres and individuals worldwide. For more information about iRAP, visit: www.irap.org.

iRAP is currently considering options for project concepts that relate to laws or standards for periodic safety inspection for roads and financing for road infrastructure safety improvements.

II. Application strategy

iRAP welcome applications of interest from stakeholders such as governments, intergovernmental bodies, civil society (NGOs, academia etc.) and private sector in the potential for collaboration on the development of project concepts. Applications of interest should include information about the organisation, its interest in road safety and areas of focus, and a brief project concept outline.

III. Contact information

Applications of interest may be directed to Judy Williams, Global Program Manager, iRAP at Judy.Williams@irap.org.
