

**PARTICIPATING ORGANIZATION ENGAGEMENT STRATEGY
2025 CALL FOR PROJECT CONCEPT NOTES
INTERNATIONAL ROAD ASSESSMENT PROGRAM (iRAP)**

I. Overall approach to UNRSF 2025 Call for Concept Notes

The International Road Assessment Program (iRAP) is a charity with a vision for a world free of high-risk roads. With the support of partners around the world, the iRAP methodology and tools have been used in more than 110 countries to assess more than 3 million km of roads and designs for safety. The methodology and tools have been created by iRAP with donations from charitable foundations (particularly the FIA Foundation), governments, development institutions, companies, research centres and individuals worldwide. For more information about iRAP, visit: www.irap.org.

iRAP is currently considering ideas for the [2025 UNRSF call for project concepts](#) that relate to:

- Motorcycle Safety.
- Road Crash Data.

II. Application strategy

iRAP welcome applications of interest from stakeholders such as governments, intergovernmental bodies, civil society (NGOs, academia etc.), mobility clubs and the private sector in the potential for collaboration on the development of project concepts. The project concepts should consider role of the iRAP methodologies and tools in the project. This may include use of, for example, [Star Ratings](#), [Crash Rate Risk Mapping](#), the [Road Safety Toolkit](#). Applications of interest should include information about the organisation, its interest in road safety and areas of focus, and a brief project concept outline.

III. Contact information

Applications of interest may be directed to Nathalie Chiavassa, Safer Journeys Lead for Africa, iRAP at Nathalie.Chiavassa@irap.org.
