

**UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION  
STAKEHOLDER ENGAGEMENT STRATEGY FOR THE UN ROAD SAFETY FUND  
2022 CALL FOR CONCEPT NOTES**

## **I. Overall approach to UNRSF 2022 Call for Concept Notes**

Transport systems play an important part in industrial development by enabling movement of labour from households to firms, of goods and services between firms, and from firms to households. United Nations Industrial Development Organization (UNIDO)'s approach to road safety is intrinsically linked with the implementation of skills development projects in support to the African road transport sector.

Through this programme, UNIDO has mobilized its know-how on road safety aspects of commercial vehicles to increase the skills of aspiring and professional drivers, support their employability, and eventually mitigate the sector environmental impact and promote road safety, hence covering the social, environmental and economic dimensions of sustainable and inclusive development.

These projects result from innovative public-private partnerships involving relevant government, education and private sector organizations to achieve higher impact and sustainability.

UNIDO's approach to the UNRSF 2022 Call for Concept Notes will build on its on-going initiatives in Ethiopia, Morocco and Zambia and its successful public-private partnership model. UNIDO's approach will in particular contribute to the "Safe roads", "Safe vehicle" and "Safe user" strategic priorities of the UNRSF.

## **II. Multi-Stakeholder Engagement**

UNIDO will consider submitting joint proposals with external stakeholders such as government, civil society, private sector and international organizations. Any interested parties will be requested to contact the UNIDO focal point by e-mail and to provide a brief description of the proposed concept, no later than 20 May 2022.
